

Dhrish Parekh

Fullstack Developer

📍 Mumbai, India | @ parekhdhrish.pg@gmail.com | ✉ [Github](#) | 🔗 [Linkedin](#)

Education	
Vidyavardhini's College Of Engineering	November 2022 - May 2026
8.10 CGPA	Bachelor's of Engineering(B.E)
Experience	
Induced	Jan 2025 - present
Fullstack Engineer	San Fransisco , CA, USA
🔗 https://www.induced.com/	
<ul style="list-style-type: none">• Developed AI voice agents with multi provider support, handling thousands of automated calls and web interactions with high reliability and minimal human intervention.• Designed scalable REST APIs in Node.js/Express and integrated them seamlessly with MongoDB, supporting high-volume data access for multiple client software.• Delivered 3 full client demos, leading end-to-end development from prototype to deployment.• Effectively transitioned between five different codebases to contribute to various services and monorepo's.• Collaborated on an internal web search tool to replace web search APIs for web context in LLMs, improving the accuracy of web results by 50%.• Designed event-driven, object-oriented architecture, improving modularity and reducing maintenance overhead.• Created 3+ packages, including notification, event bus, etc, improving modularity of the code in the monorepo.• Optimized SQL and MongoDB queries to enhance API call performance by 10 times.• Integrated third-party APIs to automate processes for software applications.	
VeerOne - Procurent Group	May 2024 - Jan 2025
Founding Fullstack Engineer	HongKong , SAR
<ul style="list-style-type: none">• Founding engineer for VeerOne Search, partnering with a veteran Silicon Valley founder to build the product and scaled it to 265k+ users before it was sunset in 2024.• Optimized AI search infrastructure by shifting from third party to self hosted service, driving more than 90 percent reduction in search related costs.• Engineered and implemented serverless function calls within a Next.js application to leverage AI tools and enhance application capabilities.• Engineered a programmatic SEO strategy by generating sitemaps for 200,000+ queries, unlocking search visibility for dynamically generated AI content.	
<ul style="list-style-type: none">•Developed 15+ interactive widgets (charts, weather, finance) to enhance site engagement.	
<ul style="list-style-type: none">• Developed reusable React components with TailwindCSS, ensuring responsive design and maintainable UI for over 15+ interactive widgets to boost user engagement.• Optimized Next.js fullstack features, cutting load times across dynamic routes.	
Cerebralzip Technologies Pvt Ltd.	Feb 2024 - Aug 2024
Software Engineering Intern	Mumbai , India
🔗 https://cerebralzip.com/	
<ul style="list-style-type: none">• Implemented lazy loading for key components, significantly improving render performance and reducing unnecessary load on the application.• Developed a robust file upload system capable of handling large files efficiently using web sockets.• Played a major role in restructuring a large scale production codebase, improving maintainability, performance, and long term scalability.• Optimized React rendering behavior by eliminating unnecessary re renders, resulting in smoother interactions and noticeably faster UI performance.• Implemented a whole new global state management ensuring predictable, efficient data flow across the application.•Delivered robust form validation and meaningful UI/UX enhancements, improving usability and reducing user friction across the app.	
Skills	
Programming Languages	
Typescript, Javascript, CSS, HTML, SQL, Python	
Frameworks:	
Nextjs, React, Vue, Express, Nodejs, GraphQL, tRPC, Hono.js	
Databases	
PostgresSQL,MySQL, SQLite , MongoDB,Redis , VectorDB's(PineCone, Postgres Vector, ChromaDB)	
ORM/Libararies	
Prisma, Drizzle, Mongoose, React Redux, Zustand, JWT, socket.io, Lodash ,TailwindCSS, ShadCN/UI , Vercel AI SDK	
Tools and Deployment	
Git, Docker, GitHub Actions, Bash, AWS (EC2, S3 , Lambda), Cloudflare, Vercel, Netlify	
AI Tools	
Cursor/Windsurf/Antigravity , CodeRabbit , Claude Code	
Projects	
ForgeCommerce	
Nextjs, Typescript, Prisma ORM, PostgreSQL(supabase), Tailwind/CSS	
🔗 https://forge-commerce.vercel.app/	
<p>ForgeCommerce is a headless Next.js-based e-commerce storefront, showcasing a polished, customizable online store deployed via Vercel. Built with React/TypeScript, it features dynamic product listings, shopping cart functionality, and storefront routing demonstrating how to architect a modern, fast, and scalable e-commerce site without relying on a monolithic CMS.</p> <p>A deployed Ecommerce Store can be found at :</p> <p>https://forge-ecomm-store.vercel.app/</p>	
RAGVault (npx ragvault)	
Typescript , VectorDB, RAG , Express , Npm	
🔗 https://www.npmjs.com/package/ragvault	
<p>RAGVault is a terminal-based tool that enables local Retrieval-Augmented Generation (RAG) workflows, allowing users to embed their own documents, store them in a local vector database, and query them using a language model all from the command line. Designed for privacy and developer efficiency, it eliminates the need for external APIs by performing all steps locally, making it ideal for personal knowledge bases or offline document querying.</p>	
Mentions	
Open source contributor	2024
Contributed to the viral morphic.sh project named Morphic which was one of the best projects in React Award Show and has over 7.2k github stars	
Runner-ups in VCET hackathon'23	2023
Made a duolingo-type app within 12 hrs and came up as the runner ups	
Finetuned llama3b	2024
🔗 https://huggingface.co/whycurious101/twitter-finetune-3b	
Finetuned llama3b on viral tweets to find patterns in them.
